The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-6 and 9-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1: line 3, “fold until complete sticking” fails to particularly point out the invention, how is the “sticking” effectuated, line 5, what is the nature of the pins and how do they interact with the other structure, “the connecting spot” lacks antecedent basis? In claim 2, what does “is struct” mean and how is bending of the bag averted by this element?

Applicant, in the response has ignored all of the issues raised supra except for the “sticking” issue, accordingly they are repeated. With respect to “complete sticking” of claim 1, line 3, applicant points to the text 5 lines from the bottom of page 1 of the disclosure. It is noted that this calls for “entire sticking”. How does this relate to the claimed term “complete sticking”? The detailed description at the top of page 3 sheds no light on the “complete sticking” issue, but refers to “snapping” into a groove, how is this related to “sticking”?

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-6 and 9-12 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The queries of the

112 rejection *supra* are offered under this statute as well. Not only are the meets and bounds of the claims undeterminable, but enablement is deemed lacking for the operation of the “fixing pins” in the disclosure fails to set forth how they function to “fix” parts 5 and 6 “in one plane” as called for on page 3, line 8. The nature of the “bending” and “bed 10”. of claim 6 are a mystery as well “bed 10”. The former is depicted by broken lines with no hint of any substance. As the queries *supra* prevent determination of the particulars of the claimed substance, no art is being applied at this time.

Claims 7-8 stand withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 8/30/07.

The changes to the drawings and the specification are approved.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
